github.com/arjunmehta

PROFESSIONAL SUMMARY

Computer Science graduate with full-stack internship experience and a strong foundation in Python, Java, and JavaScript. Independently built and deployed two functional applications beyond academic requirements. AWS-certified with demonstrated ability to contribute to agile development teams from day one.

INTERNSHIP EXPERIENCE

TechNova Solutions

Software Developer Intern

Pune, Maharashtra

Jun 2023 – Aug 2023

- Built a customer feedback module using React.js and Node.js, reducing manual data entry by 40% and improving response collection turnaround
- Optimized 15+ SQL queries for the analytics dashboard, improving data retrieval speed by 30%
- Delivered all assigned features within sprint deadlines with zero rollback incidents, collaborating within a 4-member agile team

PROJECTS

SmartExpense Tracker

2024

- Developed a full-stack personal finance app using React, Node.js, and MongoDB with category filtering, monthly trend reports, and JWT-based authentication for secure multi-user access

Campus Event Portal

2023

- Built a college event management platform using Python and Django, onboarding 500+ student registrations within the first month of deployment
- Designed an admin dashboard for event creation, RSVP tracking, and automated email notifications
